UC Santa Barbara

Health Professions Advising September Special Edition

The UCSB Health Professions Advisors have put together a special edition of our Health Professions Advising Newsletter which spotlights the accomplishments of our recent alumni who have been accepted into health professions graduate programs.

We are proud of their success and excited to share the advice they have for you, our current UCSB prehealth students.

As you read the advice from your peers, consider how that advice might apply to you; some will be relevant, some may not. Please do not hesitate to reach out to our pre-health advisors to help you consider these issues and determine the next steps along your prehealth track.

Also, be sure to check out the information and resources following the recognition of our outstanding alumni!

We look forward to seeing you this fall!

Take Care,

UCSB Health Professions Advising

Christopher Le

B.S. Physiology, UCSB Class of 2018

Allopathic Medicine (MD), University of Colorado School of Medicine

It's a given that you'll have to work hard and do well, but it's also important that you value your experiences and enjoy them. No matter what program you're interested in pursuing, there will be "boxes" that you're expected to check off. However, a strong applicant shouldn't view these things as items to just get done. With every experience, it's crucial that you self-reflect, grow, and learn something about yourself and your passion for pursuing medicine. Doing this will make the application process easier and more rewarding. Adding to this, balance is extremely important and will continue to be essential throughout your career. Make sure, you're taking time to take care of yourself and do the things that you really enjoy along the way.

This journey is truly demanding and with that being said, it's important to use the resources available to you. Your peers, mentors, advisors, etc. are all really good sources of advice and support. It's likely that someone you know is going/has gone through the same process as you; Don't be afraid to reach out!

Lastly, don't feel rushed. Maintaining a strong GPA, taking the MCAT, doing research, volunteering, getting involved in valuable clinical experiences, all while taking care of yourself can be difficult to manage. If need be, take a gap year or years. In my experience, taking two gap years allowed me to successfully balance all of these things while giving me a nice break from the classroom setting, and also, time to grow as a person. I wish you all the best of luck in the pursuit of your ambitions!

Schyler Said B.S. Biological Science, Minor Feminist Studies UCSB Class of 2019 Allopathic Medicine (MD), Drexel University

One of the best investments of your time will be getting to know yourself, because you will give yourself the most tools to succeed if you know your genuine interests, limits, strengths, and weaknesses! Finding what specific classes and extracurricular activities you actually enjoy (rather than just "checking the boxes") will make working hard at them feel a lot less like work, and will teach you how to play your strengths by time you're ready to take the next step of applying for the school of your choice! Best of luck, Gauchos, UCSB prepares you so well!

Abhilasha Kumar

B. S. in Biological Sciences Allopathic Medicine (MD) Loyola University Chicago Stritch School of Medicine

Get out into the community and learn about the careers you are interested in! This will not only help you finalize the field you want to go into, but you will also gain quality experience in the process. Also, utilize your resources, whether it be through school-sponsored advising and events, speaking with upperclassmen about their experiences and asking for advice, or doing your own research about the process online!

Ilana Zago B.S. Biological Science, UCSB Class of 2019 Allopathic Medicine (MD), TCU & UNTHSC School of Medicine

Advice: "Throughout my undergraduate years, I was often told to switch my major, that my GPA was too low, and I should pursue another path. However, I had a deep understanding that medicine was my calling and was willing to do whatever it took to improve my grades and secure acceptance to medical school. Despite the obstacles I faced, I persevered. If I can do it, you can do it! Trust in this process and have faith in your journey. Everyone's path to medicine is unique and anything is possible with determination, hard work, and a positive attitude.

Advice for the pre-med years: Focus on doing well in your courses and don't be afraid to seek help from your professors if you need it, they are there to support you! Your undergraduate GPA is so important. Pursue extracurricular activities you are passionate about and will keep you motivated throughout this journey. Cultivate a solid support system and prioritize your own wellness. Finding balance in this years will set you up for success in medical school.

Advice for the MCAT: Create a study schedule for yourself and stick to it. I found that studying at 4:30am before work each day was the most productive since I didn't have any distractions. Take a lot of practice tests and thoroughly review each question, even the ones you got right. Khan Academy is a wonderful free resource.

Advice for the application cycle: It's a long process but you've already made it so far! Invest the time into writing your personal statement and activities early on. Tell your story, have a few people you trust edit your work, and use Grammarly. I recorded myself answering mock interview questions and that helped boost my confidence.

Lastly, believe in yourself!"

Jacob Andrew B. S. in Pharmacology, UCSB Class of 2018 Allopathic Medicine (MD) University of Massachusetts

I would recommend that current pre-health students reach out to older students or alumni that are ahead of them on the pre-health path. The advice and information I received from UCSB alumni that were applying or already in medical school proved critical in my successful application cycle.

Janelle Liu B.S. Biological Science, UCSB Class of 2019 Physical Therapy, Cal State Northridge

An update after 1st year of PT school from Janelle Liu: Make sure professional school doesn't "become your life"-it can be stressful to always be talking about school with classmates/thinking about school even after class, so I made sure to keep up with my other interests and hang out with my non-school friends as well (I think this applies to undergrad too). Also, in professional school your classmates are not your competition-everyone's there to help each other (again, I think that adopting this mindset during undergrad can be really helpful too).

Health Professions Advising Events & Activities Calendar September 2020

Note: drop-in advising will take place on Tuesdays and Wednesdays from 1:00pm - 3:30pm & alternating Fridays from 9:00am - 11:30am (see below)

THE RYU HURVITZ ORTHOPEDIC CLINIC in Santa Barbara seeking a full-time Medical Assistant

We will consider strong applicants seeking part-time work, with the intention of transitioning to a full-time position in October. Previous experience and knowledge of basic medical terminology is preferred but not required. We are willing to train the right candidate.

Excellent verbal and written communication is required. Multitasking efficiently and the ability to handle pressure gracefully is a must. Our ideal candidate is self-motivated, responsible, team-oriented and has the ability to solve problems in a fast-paced environment. Job description includes a mix of administrative and clinic-oriented duties. Responsibilities include, but are not limited to: rooming patients, taking histories, setting up injections, basic pre and post-operative care, coordinating referrals, responding to patient questions, filling out disability paperwork, contacting insurance companies and scheduling MRIs/CTs. Cross-training for other positions will be required. This position provides an excellent opportunity to work alongside highly respected physicians while learning the ins and outs of the healthcare industry.

*Please note that, due to the extensive amount of training, we require a minimum of a two-year commitment. Please apply to this job only if you are truly passionate about helping patients and you are serious about providing the best quality of care.

To apply, email your resume, three references and a cover letter explaining why you believe you are the right person for this position and a good fit for our clinic. Email applications to the clinic's practice administrator, Jenny. Email: jenny@therhoc.com

Conversations with Clinicians Summer Seminar Series

In an attempt to keep students and our medical community engaged in issues surrounding the medical humanities during these turbulent and uncertain times, we are doing a virtual Summer seminar series: "Conversations with Clinicians." Conversations with Clinicians will be an ongoing informal discussion with clinical and public health leaders about key issues regarding the humanities as applied to clinical medicine, public health, and society during pandemic. The first discussion will be surrounding the impact this pandemic has had on professionalism and character of health providers. You can register for the webinars at

https://enroll.professional.ucsb.edu/search/publicCourseSearchDetails.do? method=load&courseId=33332506

The webinar is open to past and current UCSB students enrolled in UCSB Medical Humanities Program in addition to students interested in the program. The webinars are also open to members of our local Santa Barbara university, medical, public health, and activist community. You can learn more about the UCSB Medical Humanities Certificate Program at https://professional.ucsb.edu/certificatemedical-humanities.

The panel based webinars will be Tuesday evenings at 6pm and the topics, panelists, and details will attempt to be reflective of contemporary issues surrounding the COVID19 pandemic. Please see the tentative course outline below.

For all those out there on the frontline, hang in there. For all those who are training to be on the frontline, hang in there. What you do matters!!

Jason Prystowsky MD, MPH

8/4 - professionalism and character during COVID - Jerome Hoffman (UCLA emergency medicine), Charles Stolar (Columbia surgery), Kayla Rosen (UCSB student health, SB Neighborhood Clinics).

Moderator: Jason Prystowsky- How has COVID19 pandemic changed the role of the physician and healthcare team? It has been said that the pandemic has pulled back the veil and shown both weaknesses and strengths in our healthcare system, and both heroic virtues and weak shortcomings in the character of the healthcare personnel in the trenches. . . what character virtues do healers need moving forward? Advice for students interested in healthcare within the context of COVID. We will discuss courage, curiosity, integrity, perseverance, ego, and more.

- 8/18 Critical Care and allocation of scarce resources during COVID
- 9/15 Mental health in the age of COVID
- 9/29 Racial Disparities during COVID

Attention Test-Takers!

Closure of U.S.- and Canada-based Pearson VUE-owned Test Centers

Due to increasing concern for the health and safety of our candidates and our employees and in response to government guidance and difficulty procuring the critical hygienic products that keep our test centers safe, we are temporarily closing our U.S. and Canada-based Pearson VUE-owned test centers starting Tuesday. March 17.

Candidates can reschedule their exams for appointments starting April 16 and beyond if conditions allow. For information on global regions outside the U.S. and Canada, please see below.

Candidate Scheduling Information

If you already have a scheduled exam:

Tou will receive an email cancellation notice and you will etitler receive a retund (if paid to Pearson VUE) or an extension as determined by your exam sponsor. We will work with you to reschedule your exam as soon as it is safe to resume test delivery (on or after April 16).

If you are looking to schedule an exam:

Registration windows for new exam appointments will not be available until Ap 16. If you have additional questions regarding voucher usage or testing window please visit your exam program homepage to speak to the customer service tea associated with your program.

For a list of all tests administered by Pearson VUE:

Great Resource

The National Association of Advisors for the Health Professions (NAAHP) has created a page with links and resources to help you understand how professional school applications and admissions tests are being affected by COVID-19!

https://www.naahp.org/covid-19hplinks/home

Interested in the science of compassion & service? The UCI Global Service Scholars program prepares aspiring leaders across the University of California system to solve the problems of tomorrow. Scholars of all backgrounds will learn about the science and practice of compassion and how to effectively leverage it to make a difference.

In the summer of 2021, they will apply those lessons through a one-month service project or internship, partnering with local and international organizations that work in numerous areas such as sustainability, poverty alleviation and justice. We have adjusted the 2021 program for the health and safety of our students. Applications for the 2021 cohort are now open for your campus! Santa Barbara students have until August 31 to
